# Quality of Service Reporting

## Operating Instructions

### General

- 1 All service tabs relevant to a public supplier must be completed for the workbook to be accepted by the TRC.
- 2 All fields on all relevant service tabs must be completed, either with the measured statistic or as one of the approved codes.
- 3 No units of measure (eg. 'seconds') should not be entered in the **Statistic** column.
- 4 Where the template requires a particular unit as a measure, it should not be provided as another unit (e.g. seconds instead of minutes)
- 5 **Entry Codes**  
The following codes are to be used in the statistic column for a particular measurement in the event that statistic cannot be provided:
  - NAP not applicable; measurement is not applicable to the service being provided by the public supplier; must have been previously agreed with the TRC that this measure is not applicable.
  - NDA no data available; the statistic requested is relevant to the service being provided but the public supplier is currently unable to provide the statistic. Must have been previously agreed with the TRC that this statistic cannot be provided.
  - TBS to be supplied; the statistic requested is relevant to the service being provided and will be provided at a later date; must have been previously agreed with the TRC.
- 6 The comment fields on each service tab can be used to provide additional information/explanation of the statistic being provided.
- 7 The workbook should be named as follows:  
QoS Report - YYYY-QN - <supplier name>  
where,

YYYY the year of the reporting quarter  
N the number of the reporting quarter

8 The structure of the workbook is not to be modified in any manner; the workbook is processed by an automated reader which expects the workbook to be in a particular format.
